Introduction

Baltistan (སྦལ་ཏི་སྐྱུན) is one of the most historic places in world with an ancient culture and traditions. But whenever we talk about Baltistan the things we discuss are the cultural dressing, music, architecture, games etc.

Baltistan has contributed a lot in Urdu and Balti Literature. There are number of Poets and Writers of Baltistan who are contributing in the Literature but there is no proper platform in order to publish and appreciate their work in terms of electronic media. The only way is that a writer publish his books only via printing.

Problem Statement

Every day the trend of reading getting less especially in Baltistan. Everyone prefers internet and electronic media more than print media and reading physical books. If someone is really interested to read the Balti writers and poets' one have to contact the poet or search for the book that takes a lot of time. There is no proper record in order to search specifically about the Writers and Poets of Baltistan.

Problem Solution

Now a days people prefer to read poetry and books on Mobiles and Laptops because it is much easier and less costly. Trending poetry are being shared on different social media platforms in videos and image forms. Andaz-e-Sukhan (انداز سخن) is the application that will boost up the trending Poet or writer by ranking.

Scope

The core purpose of Andaz-e-Sukhan application is to keep the record of the Balti literature in Urdu and Balti language also about the legendary writers and poets of Baltistan who contributed in Urdu Literature as well. This is a user friendly application that allows the user to read about the Baltistani Culture through modern platform.

Modules of the project

Admin

Admin can control the activities on the application and the user will not be able to publish anything until the admin grants permission. Admin will also be able to check and respond about the copyright.

User:

After registering the user will be able to post his content on the web application. The user will be restricted in term of getting permission from the admin to post the content.

Registration:

This module will allow the user to get registered in the application. The user will not be able to publish anything until the admin grants permission.

Profile Ranking

Users would be able to achieve ranking levels by their performance.

All kinds of images, pdfs and texts are allowed to upload the content.
